# The Labor and Delivery Suite from Operative Experience.

Finally, a complete and integrated training solution for the entire labor and delivery continuum of care.

Say goodbye to the old, unreliable plastic manikin technology and discover what real, hands-in-the-body simulation looks like. OEI simulators are fully operable and feature incredibly accurate and tactile anatomy, realistic blood and fluids, and are uniquely designed to provide learners with a high-adrenaline, real-world operative experience.

And, with OEI, there's no complicated programming or setups and no simulator down time – because our products simply work.

## RealMom™

### Vaginal Delivery

The world's most natural and realistic vaginal delivery simulator.

- + Natural delivery with active, soft tissue birth canal
- + Realistic, soft tissue and accurate internal anatomy
- + Full-body female simulator and full-term baby with unsurpassed realism and lifelike appearance
- + Provides a full-range of delivery procedures including forceps and vacuum assist
- + Postpartum hemorrhage control
- + Instructor control of dilation and delivery progression
- + Physiological presentation and control of maternal and fetal heart rate, fetal heart tones and contractions, pulses, blood pressure and SPO<sub>2</sub>

## C-Celia™

### C-Section

A complete C-Section delivery training system available as a full suite or in custom configurations designed to meet your learning needs.

- + Fetal Extraction Simulator – open, post C-Section abdomen enabling difficult delivery maneuvers including forceps and suction assist
- + C-Section Skills Trainer – abdominal and incision repair simulator with pregnant abdomen and uterus for incision practice and tissue repair
- + Emergency C-Section Delivery Simulator – pregnant abdomen simulator enabling full transverse or vertical emergency C-Section through abdominal wall and uterus with baby, placenta, and pressurized lubrication system with simulated amniotic fluid

### Postpartum Hemorrhage

Open abdomen simulator for practicing hemorrhage control techniques.

- + Postpartum hemorrhage control trainer with integrated pressurized bleeding and lubrication for repair of complex lacerations and uterine artery injuries
- + Open abdomen with empty, durable, multi-use uterus enables scores of procedures before uterus placement
- + Supports hemorrhage control techniques including Bakri Balloon, B-Lynch suture, Hayman suture and O'Leary Stitch

### Emergency Hysterectomy

Training for postpartum and caesarean hysterectomy procedures including hemorrhage control and fully-operable removal of the uterus.

- + Open abdomen with bleeding and integrated lubrication includes durable, flaccid, abdominal wall insert, attachable, partially contracted uterus
- + Model contains a uterus, bladder, ureters and detailed representations of uterine arteries
