

# The **3-Dmed**® **Lap Tab** *trainer*™

- with side ports

Model  
LTS

It still folds flat for convenient storage or travel.

The wings are hinged and swing into place for use.

The side ports allow side access to the trainer providing the surgeon with the experience of working 45° to 85° to the camera viewing axis.

The side ports expand the functionality of the Lap Tab.

# The **3-Dmed**® Lap Tab *trainer*™

Thank you for buying products from **3-Dmed**®.

## SETUP INSTRUCTIONS

Please note that the tablet or smart phone is not included.

Figure 1

Figure 2

Figure 3

Figure 4

Figure 5

Figure 6

Figure 7

Figure 8

1. Figure 1 Shows the Lap Tab trainer laying face down with the back window facing up (Fig.1).

2. Stand the trainer up with the back window facing you (fig. 2).

3. With your thumb and fingers grab the back window and the bottom edge of the base (see arrows in fig. 3).

4. While holding the window and the base, bring these parts toward you (fig. 4).

5. You will see that the base is unfolding (fig.5).

6. Make sure the back window rests securely against the lip on the base (see arrow in fig.6).

7. Looking at the front side of the trainer you will see a hole in the center just above the ledge (see arrow in fig.7) This is where the camera will line up to view the work area.

8. The ledge in front is where you place your tablet or smart phone (fig.8). Slide your device left or right in the ledge until your camera is centered over the hole. NOTE: your device may NOT be centered on the trainer.

Most devices provide the option to record your activities for later review.
