

HOLSTEIN VENIPUNCTURE AND INTRAMUSCULAR INJECTION MODEL

The VSI Holstein Venipuncture Intramuscular Injection model is an integral part of clinical studies for veterinary practice. Our fidelity bovine simulator is realistic in presentation and size and provides students the opportunity to use anatomical features to identify injection sites in a controlled setting. Students can repeat processes and procedures to gain confidence and expertise prior to moving to live animals. At Veterinary Simulator Industries, it is our mission to “Improve animal welfare through simulation” and the addition of our Holstein venipuncture model moves us towards our goal.

TECHNICAL SPECIFICATIONS

- Optional VSI metal Rolling Stand
- Durable Silicone with metal armature
- Removable head for ease of transportation, and replacement of components
- Removable/washable hide covering. Can be replaced when worn
- Comes with 5 sets of replacement veins

PRODUCT BENEFITS

- **Jugular Venipuncture**
 - Using anatomical landmarks, students will learn to seclude and palpate veins
 - Endures multiple punctures and includes 5 sets of replacement veins
 - Pressurized blood bag included
 - Replaceable hide covering to conceal injection sites
- **Intramuscular injection site**
 - Well rendered anatomy illustrates injection landmarks
 - Accepts fluid injections and can endure multiple punctures
- **Soft silicone head**
 - Removable and replaceable ears for tagging
- **Rolling Stand**
 - Adjustable for height, rostral tilt, 90 degree rotation
 - Stand is compatible with other VSI products

Without Stand 1025543

With Stand 1025548

REPLACEABLE PARTS

Bovine Jugular Veins (set of 10)	1025546
Intramuscular pads (set of 2)	1025545
Bovine Neck Venipuncture Hide	1025544
Neck Venipuncture Fluid	1025547
Replacement Ears (L&R)
