

Ewe Theriogenology Model

Advanced Training for Artificial Insemination & Reproductive Procedures

The VSI Southdown Ewe Theriogenology Model is a realistic, anatomically accurate training tool developed for advanced artificial insemination (AI) and reproductive anatomy education. Precisely replicating the posterior anatomy of a Southdown ewe, this durable simulator features a silicone uterus, functional udder, and replaceable components to deliver realistic, hands-on learning in theriogenology.

Ideal for both students and professionals, the model provides lifelike feedback and supports multiple AI techniques — including vaginal, cervical, and transcervical intrauterine insemination — ensuring comprehensive, practical training.

TECHNICAL SPECIFICATIONS

- Constructed from epoxy/fiberglass, accurately replicating the posterior anatomy of a Southdown ewe.
- Soft AI perineum panel, replica pelvis, and flexible removable tail for realistic handling.
- Durable silicone uterus with cervix, broad ligament, and multi-stage ovaries showing follicles and corpus luteum.
- Functional udder with milk tank to simulate mastitic milk.
- Possibility for udder tubing to increase simulation realism.
- Replaceable components for extended training use.
- Easy to assemble, clean, and maintain.
- Instruction booklet outlining the features of your model.

Southdown Theriogenology Model | 1025604

DAY ONE SKILLS & PRODUCT BENEFITS

- Practice vaginal, cervical, and transcervical AI techniques with realistic anatomical resistance.
- Develop tactile familiarity with ewe reproductive structures, including the uterus, cervix, and ovaries.
- Gain hands-on experience in udder examination, milking, and mastitis simulation using the functional udder system.
- Strengthen palpation and reproductive anatomy identification skills.

REPLACEABLE PARTS

Southdown Ewe Ovary Set	1025611
Southdown Ewe Reproductive Tract Assembly	1025613
Southdown Model Tail	1025614
Southdown Model Teats	1025615
