

CANINE DENTAL TECHNICIAN MODEL

BASE MODEL & PACKAGE MODEL AVAILABLE

The VSI Canine Dental Technician Model offers an authentic and versatile solution for hands-on veterinary dental practice. Designed to replicate clinical conditions, it features simulated teeth and bone surrounded by soft rubber gums, delivering a realistic experience for procedures such as manual and ultrasonic scaling, periodontal probing, nerve block administration, and intubation training using detailed anatomical landmarks. The model's interchangeable maxilla and mandible components enhance its versatility, allowing for repeated use across various training sessions. Whether in academic settings or professional development programs, this model is a valuable resource for developing and refining essential veterinary dental skills.

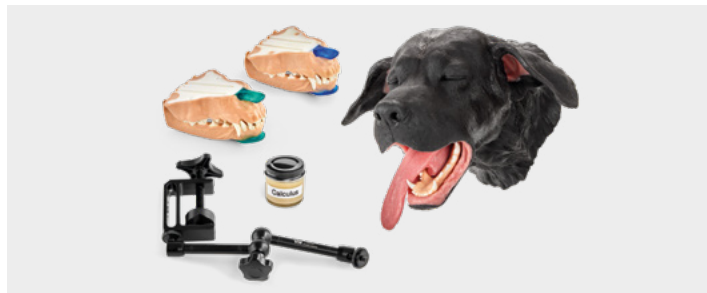

Canine Dental Technician Base Model

What's Included:

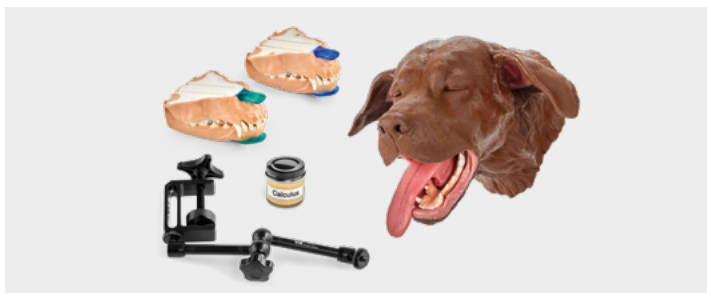

- Canine dental model (available in black or brown)
- One scaling jaw set
- One X-ray jaw set
- Removable tongue
- 30 ml jar of artificial calculus

DAY ONE SKILLS & PRODUCT BENEFITS

- **Realistic Oral Anatomy** – Simulated teeth and bone are surrounded by soft rubber gums.
- **Scaling Practice** – Perform manual and ultrasonic scaling using simulated teeth and gums with artificial calculus.
- **Probing and Nerve Blocks** – Train in periodontal probing and administering local anesthesia.
- **Radiograph Positioning** – Utilize the X-ray jaw set to support accurate dental imaging and radiographic technique training.
- **Intubation Training** – Practice airway management using detailed anatomical features, including the tongue, trachea, epiglottis, and esophagus.
- **Durable & Replaceable Components** – Easily replaceable maxilla and mandible allow for repeated use and extended training versatility.
- **Stable Setup for Hands-On Practice** – Includes a table clamp and arm for secure model positioning during procedures.
