

Tuberculosis Caudal Fold Tail Models

Elevate veterinary education with the Bovine Tuberculosis Caudal Fold Tail Models, designed to support practical, hands-on training in tuberculosis (TB) testing. These realistic models allow students to observe and palpate the caudal fold, helping them build confidence and diagnostic accuracy in identifying TB test responses.

Each model includes four distinct TB response stages: Normal, Small Firm, Diffused, and Medium Firm, providing comprehensive training across a range of diagnostic scenarios. Available in both Hereford and Holstein breeds, these durable training tools deliver an authentic, practice-based learning experience ideal for veterinary and animal health programs.
