

FELINE TECH SIMULATOR

The Feline Tech Simulator is an advanced simulation tool designed to prepare Veterinary Technician students for real-world clinical scenarios. Built to provide hands-on, repeatable practice, this full-body feline model is ideal for training in radiography, blood collection, dentistry, and more.

KEY FEATURES

- **Realistic Feline Anatomy**
Designed to mimic natural movement, shape, and feel.
- **Removable Dentistry Module**
 - Perform dental cleanings
 - Practice charting and probing
- **Full X-ray Skeleton**
 - Includes removable radius and caudal vertebrae
 - Pre-fractured bones simulate transverse and oblique breaks
- **Venipuncture Practice**
Multiple blood draw sites for front and hind limbs.
- **Intubation Practice**
Allows veterinary students or professionals to safely learn and practice airway management.
- **Positioning and Bandaging**
Practice proper restraint, positioning, and wound management.
- **Removable Eye**
Eye can be lubricated and removed for cleaning or replacement.

PROCEDURAL TRAINING OPPORTUNITIES

- Radiographic positioning and interpretation
- Intubation and airway management
- Venipuncture and blood collection
- Feline dental assessments and cleanings
- Bandaging and restraint techniques
- Anatomical education and fracture identification
- Proper eye care and maintenance
