

REALISTIC TRAINING FOR FORENSIC INVESTIGATION AND INJURY INTERPRETATION

LIFECAST FORENSIC MANIKIN

The Lifecast Forensic Manikin represents a deceased adult female and provides a realistic, hands-on training solution for forensic investigation, injury recognition, safeguarding, and law enforcement education. Featuring 32 detailed injuries and wounds, including post-mortem characteristics, the manikin allows learners to observe, document, interpret, and discuss injury patterns in a safe and repeatable training environment.

Designed for classroom teaching, case-based learning, and immersive scenarios, the manikin helps learners move from theoretical knowledge to practical observation and assessment of trauma presentations relevant to forensic, medical, and investigative training.

- Ultra-realistic deceased female forensic training manikin
- 32 detailed injuries and wounds for observation, recognition and discussion
- Includes bruises, abrasions, scars, lacerations, stab wounds, gunshot wound, open fracture, needle marks, and post-mortem staining
- Supports forensic science, healthcare, safeguarding, and law enforcement training
- Suitable for classroom teaching, case-based learning, and immersive scenario training
- Encourages realistic observation, documentation, and professional communication

Bruising to the eye and cheek, faint ligature mark around the neck and a head laceration

LIFECAST FORENSIC TRAINING

Lifecast manikins are designed to create realistic and emotionally engaging training experiences. The Lifecast Forensic Manikin expands the range into forensic and investigative education, helping learners bridge the gap between theoretical knowledge and practical observation of injury patterns.

Training applications include:

- Forensic science education
- Law enforcement training
- Healthcare and hospital-based training
- Safeguarding and abuse-recognition scenarios
- Medical, legal, and multidisciplinary case discussions
- Crime scene and injury documentation training

Lifecast Forensic Manikin 1027211

Each manikin is individually finished by hand. Slight variations in appearance, coloration and injury details are to be expected.

Petechial hemorrhages behind the ear

Chronic injection sinus
